

**Northern Dare Beaches Shore Protection and  
Erosion Abatement Project Reach 1  
2002 Dare County Aerial Photo With  
Beach Nourishment Easement Line Shown in Green**

US Army Corps  
of Engineers  
Wilmington District

Property lines overlaid on this photo in black are from the tax maps. They do not reflect surveyed lot line boundaries. Please refer to the survey map for actual property boundaries with respect to property that extends out to mean high water.

The lot lines shown on this sheet are not an indication of the amount of fill that will be placed in front of a property. The fact that some lot lines on the tax map are in farther or out farther than the adjacent parcel will not cause the the construction of the new beach profile to be varied from lot to lot. The new beach fill will be constructed from the easement line seaward with a consistent profile as illustrated on the typical construction profile.
